missing KINEROS precip file

Posted by elsadek - 2008/06/05 18:44

_____

I am trying to use a user-defined,option 1 to write the precipitation file for KINEROS but the model didn't create the file, I don't know why.
Do you have any answer for that?
Ashraf

_____

Ashraf,
You're right, it isn't working. This must have been missed during testing. Until an update is released, you can always edit an existing precipitation file with a text editor to make it match your hyetograph. Just remember the depth is cumulative and not incremental.

Let me know if you have any questions on editing the existing precipitation file.

Shea
